I am college student with a strong passion for web development. I've gained proficiency in programming languages like PHP and JavaScript, worked with frameworks such as Laravel, Codeigniter, Nextjs and utilized tools like Tailwind and jQuery. I'm known for my honesty, discipline, and teamwork skills. Currently, I'm working as a freelance programmer, eager to learn more, and excited to contribute to this ever-evolving field of web development.

Work Experience

JANUARY 2020 – NOW

Programmer (Freelancer)

Carotech

- Assisting in the development of customized software programs tailored to the client's specific requirements, including debugging and troubleshooting issues that may arise during the program's development and implementation.
- Collaborating and consulting with clients to gather project requirements and objectives, offering solutions and recommendations to meet their needs effectively, and teaching clients to understand the program's functionality and workflow.
- Successfully completed over 100 projects, each within less than a week.
