TailwindCSS

Hi 🖐️. i am **Catur Hendra,**
a Web Developer

As a student striving to fund my education

Hit me

ABOUT ME

living ✨

Born in Surabaya in 2002, and I'm the youngest of four siblings. I started getting into the world of IT when I was in vocational school, and that's where I found my love for web development. I began looking for ways to turn it into a career. After I graduated, I was excited to keep learning, so I decided to join Surabaya State University to study computer science.

Evolve 📖

Evolution is an endless adventure, a path where learning never stops. Along the way, I've gained skills such as web development, programing, problem solving and many other skills,my hunger for knowledge is still burning. I'm stoked to keep leveling up my skill set.

PORTOFOLIO

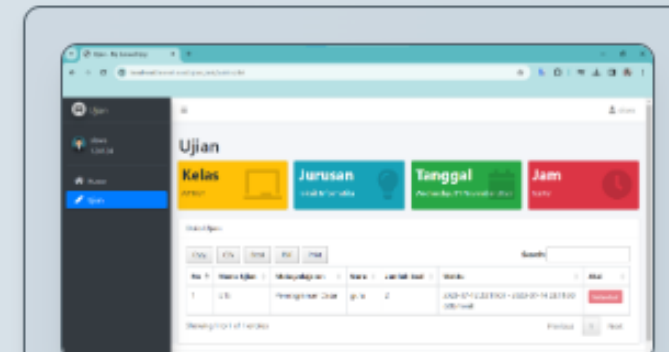

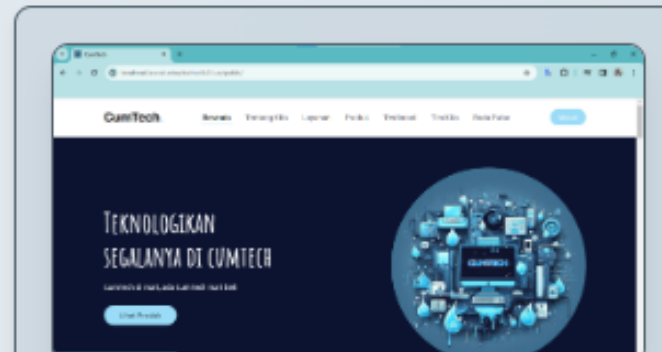

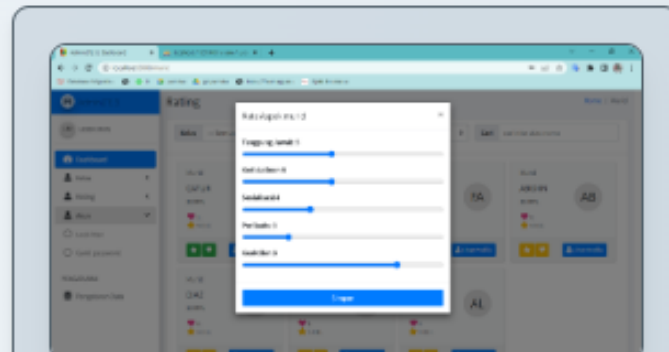

This is what i have done lastly

100++

Projects
completed

Caro

Classroom Rating Official is an elearning website that allows students and teachers to rate each other. It is built with Laravel 9, Livewire, Bootstrap and more.

CUMTech

Classy Unbeatable Modern Technologies is an marketing website that sells various electronic products with attractive features, such as a spinning wheel for buyer rewards. It is built using Laravel 10, Bootstrap, jQuery, and more.

Ujian

Ujian is an eLearning website where teachers can upload exams, and students can answer them. It is built using Laravel 10, Bootstrap, and more.

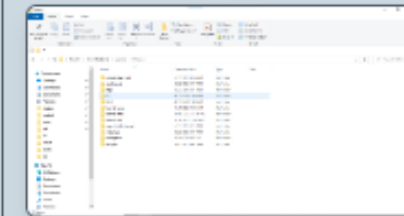

Survei

Survei is a website where users can create survey forms and distribute them to gather responses from everyone. It is built using CodeIgniter 3, Bootstrap, and more.

SuperHero Api

Super Hero API is a website for viewing information about heroes and villains in DC and Marvel comics. This data is retrieved from a public API. It is built using Next.js and TailwindCSS.

And More

Those are some examples of programs I have created. If you're interested in seeing more, please visit the Carrotech recap page [tele / Comingsoon website](#)
